

# EV CHARGING POINTS

The charging points on site are currently available to staff and visitors without a need to preregister – simply plug and charge! We do ask however that once your car is charged up, or if there are others waiting to make use of them, you limit the amount of time you charge up to then move your car to another available space on site.

## 1. LIGHTING GUIDE

The Twin features 2 lights on either side of the charger to inform the driver of the status of each charging socket they are connecting to.

## 2. CONNECTING

Ensure you use a certified mode 3 cable when using the charging points. Adapters or converters are not permitted.

## 4. DISCONNECTING

To disconnect your cable from the charging point you must first unlock your car and stop the charge process. This will then automatically unlock the cable from the charging point.

## 3. CHARGING

Once connected the charge will commence automatically and there is no requirement to register with the app (at the current time).

## 5. SUPPORT

If you have any problems with the charging points you can call Podpoint's customer service team 24/7 on **0333 0063 503** and let the team know which point you are using. If need be they can disconnect the charger for you.
